Dept of Electrical and Computer Engineering
The University of Texas at Austin
Austin, TX 78712-1084
(512) 471-5879

Education

- Post-Doctoral Fellow, Utility Planning and Policy Group, Energy and Environment Division, Lawrence Berkeley Laboratory, February 1991–July 1992. Conducted research on electric transmission policy. Advisor: Dr. Edward Kahn.
- Ph.D., Electrical Engineering and Computer Sciences, University of California, Berkeley, December 1990; GPA: 4.0.
 - Dissertation Title: “Improving Power System Operating Efficiency Through Real-Time Control and Tariffs.” Committee: Professor Felix Wu (Advisor and Chairman), Professor Pravin Varaiya, Professor Shmuel Oren.
 - Graduate Course Work: linear and non-linear system theory, continuous and discrete optimization, topology, real analysis, stochastic processes, information theory, power systems, time series analysis, technical writing.
- M.S., Electrical Engineering and Computer Sciences, University of California, Berkeley, May 1988; GPA: 4.0.
- B.E., Electrical Engineering, first-class honors, medal (pr. acc.), University of Sydney, Australia, March 1985; GPA: 4.0.
- B.Sc., Physics and Pure Mathematics, University of Sydney, Australia, March 1983; GPA: 4.0.

Professional Experience

- Professor, Department of Electrical and Computer Engineering, The University of Texas at Austin, 9/03–present. Associate Professor, Department of Electrical and Computer Engineering, The University of Texas at Austin, 9/98–8/03. Assistant Professor, Department of Electrical and Computer Engineering, The University of Texas at Austin, 1/94–8/98. Conducted research on power system economics and continuous and discrete optimization applied to energy systems, integrated circuit layout, and ATM networks. Taught optimization, power systems, and probability and statistics courses. Supervised graduate students.
- Visiting Researcher, University of California Energy Institute, 6/00–8/00 and 7/01–8/01. Conducted research on equilibrium models of electricity markets.
- Research Fellow, Harvard Electricity Policy Group, John F. Kennedy School of Government, Harvard University, 9/00–12/00. Conducted research on equilibrium models of electricity markets.
- Staff Scientist, Utility Planning and Policy Group, Energy and Environment Division, Lawrence Berkeley Laboratory, 6/93–8/93. Conducted research on electric transmission planning and policy.
- Assistant Professor, Department of Electrical and Computer Engineering, Worcester Polytechnic Institute, 3/92–12/93. Conducted research in the areas of discrete and continuous optimization, with application to distributed computing environments, mixed-integer linear and non-linear programming, and power systems engineering. Taught control and power systems courses. Supervised graduate student.

- Research Assistant, Electronics Research Laboratory, University of California, Berkeley, 7/88–12/90. Conducted research on optimization theory applied to the coordination of capacitors in an electric distribution system and to improving the allocative efficiency of power system operation.
- Teaching Assistant, Electronics Research Laboratory, University of California, Berkeley, 2/89–5/89. Led discussion section and presented some lectures for the graduate course 221A, Linear System Theory.
- Professional Engineer, Grade 1, System Planning and Control Divisions, Electricity Commission of New South Wales, Australia, 3/85–7/86. Developed software for electricity system planning and control. Performed planning studies.
- Technical Trainee, Toshiba Corporation, Tokyo, Japan, 12/84–2/85. Observed the operation of the manufacturing facility at the Toshiba Fuchu plant.

Professional Consulting and Education Services

- Direct Energy, September–October 2008. Provided analysis of contractual arrangements regarding wind contracts.
- John Deere Wind Energy, April–October 2008. Provided analysis of contractual arrangements regarding wind contracts.
- Convenor and Moderator, “ERCOT Energized: The good, the bad, and the ugly of the new Texas Nodal Market Design,” Austin, Texas, May 2, 2008.
- FPL Energy, 2006–2007. Provided analysis of contractual arrangements regarding transmission services.
- Boston Pacific Company, 2004–present, transmission consultant to Boston Pacific in their role as independent market monitor to the Southwest Power Pool.
- Competitive Power Advocates, December 2003–present. Provide technical and consulting advice on restructuring of the ERCOT electricity market.
- Organizer and Lecturer, “Economics of Locational Marginal Pricing,” a one day course offered several times per year, 2003–present.
- Organizer and Lecturer, “Introduction to Electric Power Systems for Legal and Regulatory Professionals,” a three day course offered once per year, 1996–present.
- Competitive Power Advocates, December 2002–January 2003, “Shift Factors in ERCOT Congestion Management.” Provided evidence of economic and technical inefficiency of ERCOT congestion management protocol.
- Organizer and Moderator, “How will electric deregulation affect Texas?” Austin, Texas, May 2, 2001.
- Dynegy, Colonial Pipeline, March 2001. Prepared initial testimony in Public Utility Commission of Texas Docket No. 23335, “Application of Entergy and FPL Group Regarding Proposed Merger.”
- Frontier Economics, September 2000–April 2001. Provided expert opinion on transmission pricing proposal.
- Reliant Energy, October 1999–March 2000. Deposed in dispute between Reliant Energy and Municipalities served by Reliant concerning leasing arrangements.

- South Texas Electric Cooperative, July 1999. Prepared and filed testimony in Public Utility Commission of Texas Docket No. 19265, “Application of Central and Southwest Corporation and American Electric Power Company, Inc. Regarding proposed business combination.”
- Coalition for a Competitive Electricity Market, May 1999. Presentation at the Technical Conference on Capacity Benefit Margin, Federal Energy Regulatory Commission Docket No. EL99-46-000.
- Enron Corporation, October 1998–April 1999. Prepared testimony in Public Utility Commission of Texas Docket No. 19265, “Application of Central and Southwest Corporation and American Electric Power Company, Inc. Regarding proposed business combination.”
- Bracewell and Patterson, LLP, September–October 1996, February–October 1997. Provided expert opinion on transmission issues.
- California Energy Commission, June–August 1995. Conducted research on the effects of phase-shifting transformers in competitive electricity markets.
- Tenneco Power Generation Company, April 1995. Analyzed and prepared affidavit concerning contractual terms between Texas A&M University and Brazos Electric Power Cooperative.

Book *Applied Optimization: Formulation and Algorithms for Engineering Systems*, Cambridge University Press 2006.

Invited Presentations, Conference Papers, Book Chapters, Reports, Working Papers

- Ross Baldick, “Wind Energy and Electricity Markets,” Presented at the *National Academy of Engineering Regional Meeting*, College Station, Texas, April 29, 2009. Also presented at the University of Minnesota Internet-based seminar, June 8, 2009.
- Ross Baldick, Badrul Chowdhury, *et al.* “Vulnerability Assessment for Cascading Failures in Electric Power Systems,” Presented at the *IEEE Power Systems Conference and Exposition*, Seattle, Washington, March 15–18, 2009.
- Manho Joung and Ross Baldick, “Strategic Behavior in Electricity Capacity Markets,” Presented at *Hawaii International Conference on System Sciences (HICSS-42)*, Waikoloa, Hawaii, January 2009.
- Lin Xu and Ross Baldick, “Stability of Supply Function Equilibrium in Electricity Markets under Piecewise Linear Function Perturbations,” Presented at the *46th Annual Allerton Conference on Communication, Control, and Computing*, Monticello, Illinois, October 24–25, 2008.
- Ross Baldick and Lin Xu, “Theory and application of transmission-constrained residual demand derivative in electricity markets,” Invited Presentation, Visiting speaker series, Department of Economics, University of Guelph, September 19, 2008.

- Ross Baldick and Michael Caramanis, “Using Controlled PHEV Charging to Enhance Wind Energy,” Presented at the Workshop on the Role of Plug In Hybrid Electric Vehicles, Austin, Texas, August 18–19, 2008.
- Ross Baldick, Badrul Chowdhury, *et al.* “Initial Review of Methods for Cascading Failure Analysis in Electric Power Systems,” *Proceedings of the 2008 IEEE Power Engineering Society General Meeting*, Pittsburgh, Pennsylvania, July 20–24, 2008.
- Manuel Hernandez, Lin Xu, Steven Puller, and Ross Baldick, “Tools for Assessing Offers into Electricity Auctions,” Presented at the Power Systems Engineering Research Center Meeting, Ames, Iowa, May 14–16, 2008. Also, keynote presentation at The Seoul International Conference on Electricity Markets, Seoul, South Korea, June 18–20, 2008.
- Ross Baldick (Convenor) “ERCOT Energized: The good, the bad, and the ugly of the new Texas Nodal Market Design,” Austin, Texas, May 2, 2008.
- Manho Joung and Ross Baldick, “Moral Hazard in Electricity Capacity Markets,” Presented at the *Fourth Annual Carnegie Mellon Conference on the Electricity Industry: Future Energy Systems: Efficiency, Security, Control*, Pittsburgh, Pennsylvania, March 2008.
- Ross Baldick, “ERCOT Transition to Nodal Markets—The Basics for Lawyers,” Presented at the Institute for Energy Law, Power and Alternative Energy Conference, Houston, Texas, April 22, 2008. Also presented at the Wind Energy Institute 2008, Austin, Texas, February 19, 2008 and to the Texas Commission on Environmental Quality, June 23, 2008.
- Javier Salmeron, Kevin Wood, and Ross Baldick, “Vulnerability of Electric Power Grids,” Invited Presentation, IEEE Columbus PES Meeting, November 19, 2007.
- Ross Baldick, “Border flow rights and contracts for differences of differences: Models for electric transmission property rights,” Power Systems Engineering Research Center Teleseminar, May 1, 2007. Also presented at the Graduate Power Seminar, Arizona State University, September 21, 2007 and at the INFORMS Annual Meeting, Washington, DC, October 12–15, 2008.
- Ross Baldick, “Computing the Electricity Market Equilibrium: Uses of market equilibrium models,” Presented at the IEEE Power Engineering Society Power Systems Conference and Exposition, Atlanta, Georgia, October 29–November 1, 2006. Also presented at the Department of Automation, Tsinghua University, April 7, 2007. and the Electrical and Electronic Engineering Department, The University of Hong Kong, April 27, 2007. To appear in Xiao-Ping Zhang, Editor, *Computing the Electricity Market Equilibrium*, IEEE Press and Wiley, 2009.
- Lin Xu and Ross Baldick, “Supply Function Dynamics, Equilibrium, and Local Stability Analysis in Electricity Markets,” Presented at the 2006 INFORMS General Meeting, Pittsburgh, November 4–8, 2006.
- Ross Baldick, “Applied Optimization: Formulation and Algorithms for Engineering Systems,” Presented at the 2006 INFORMS General Meeting, Pittsburgh, November 4–8, 2006.
- Ross Baldick, “Upcoming Changes to the Texas Wholesale Electricity Market,” Presented at the Department of Electrical Engineering, The University of New South Wales, Australia, July 20, 2006.

Awards, Scholarships, and Honors

- University of Texas Faculty Research Assignment, Fall 2009.
- Technical Committee Program Coordinator, *IEEE Power Engineering Society General Meeting*, 2008.
- Fellow of the Institute of Electrical and Electronics Engineers, 2007.
- IEEE Power Engineering Society, Power System Analysis, Computing, and Economics Technical Committee Prize Paper Award, 2006 (with Richard P. O’Neill, Udi Helman, Michael H. Rothkopf, and William Stewart, Jr.)
- Best Presentation in Energy Sponsored Sessions Award, INFORMS Conference, Atlanta, Georgia, October 2003 (with Stathis Tompaidis and Sergey Kolos).
- Associate Editor, *IEEE Transactions on Power Systems*, 2004–present.
- Visiting Researcher, University of California Energy Institute, June–August 2000, July–August 2001, June–August 2002, and June–July 2003.
- Research Fellow, Harvard Electricity Policy Group, John F. Kennedy School of Government, Harvard University, September–December 2000.
- University of Texas Faculty Research Assignment, Fall 2000.
- Engineering Foundation Faculty Award, University of Texas at Austin, 1997.
- Non-Resident Tuition Scholarship, University of California, 1990.
- Non-Resident Tuition Scholarship, University of California, 1989.
- Regents Fellowship/Edward J. Norcross Fellowship, University of California, 1988–1989.
- James King of Irrawang Scholarship, University of Sydney, Australia, 1988.
- Semi-finalist, Honeywell Futurist Essay Competition, 1988.
- Regents Fellowship, University of California, 1987–1988.
- Distinguished Pass, Ph.D. Preliminary Exams, 1987.
- James King of Irrawang Scholarship, University of Sydney, Australia, 1987.

- Regents Fellowship, University of California, 1986–1987.
- J. B. Watt Travelling Scholarship, University of Sydney, Australia, 1986–1989.

Research Funding

- “PHEVs as Dynamically Configurable Dispersed Energy Storage,” Power Systems Engineering Research Center, \$70,000, July 2009–August 2011.
- “Transocean Power Plant Analysis and Modeling Initiative,” Transocean Offshore Deepwater Drilling, Inc., \$32,000, September 2008–August 2009.
- “Tools for Assessment of Transmission-Constrained Market Power in Electricity Markets,” National Science Foundation Research Grant, \$200,000, August 2008–July 2010.
- “Tools for Assessment of Bidding into Electricity Auctions,” Power Systems Engineering Research Center, \$60,000, July 2006–August 2008.
- “Reducing the Vulnerability of Electric Power Grids to Terrorist Attacks,” Department of Energy Research Grant, \$241,500, July 2005–June 2007.
- “Transmission Constrained Supply Function Equilibrium Analysis of Electric Power Markets,” National Science Foundation Research Grant, \$120,000, September 2004–August 2006.
- “Analysis and Simulation of Strategic Behavior and Price Processes in Transmission Constrained Electricity Markets,” National Science Foundation Research Grant, \$100,000, 2000–2002.
- Optimal Power Flow Software, Donated by Decision Systems International, \$50,000, 1996.
- Wattsim, Operator Training Simulator Software, Donated by Incremental Systems, Inc, \$100,000, 1995.
- “Integration of Institutional and Technical Issues in Electric Transmission,” University Research Institute Summer Research Award, \$11,000, 1995.
- National Science Foundation Young Investigator Award, \$300,000, 1994–2000.
- National Science Foundation Research Initiation Award, \$95,000, 1993–1998.

Professional Society Memberships

- IEEE Power Engineering Society, System Economics Subcommittee Chair of Power Systems Analysis, Computing and Economics Committee.
- SIAM.
- INFORMS.
