Student Comments:

1. Ramesh is a good lab instructor. He is very effective in communicating ideas with students. His teaching ability is par excellence. I learned a lot from this course and it was a satisfying experience of going through this course
2. Ramesh is a great lab instructor. He very effectively communicates ideas and concepts and also does an excellent job in anticipating problem areas for students & covering those in his selection of lesson topics. It has been a pleasure being in his lab.
3. Very good teacher. Explained everything very clearly. Was always ready to help
4. he is a good instructor and very conscience in his job as a lab instructor. He openly (---unreadable---) questions or suggests by students. His lab lecture is clear and easy to understand.
5. I found this instructor's ability to deal with the material presented to be fine. However, the course material itself seemed to focus too much on Unix and not enough on programming.
6. Ramesh Yerraballi is an excellent instructor. He is very knowledgeable and able to communicate effectively. He is always willing to provide help and answers to our questions. Good Job.

7. Ramesh's english was better than other TA's & as far as teaching anything communication is vital
8. He should a great interest in our performance and understand of the class. He was very helpful and showed us that he new what he was teaching us.
9. Ramesh needs to be more prompt while answerig e-mail queried of students. He tends to over-explain certain times
10. Excellent Performance. you communicate very well and I hope to have another class with you.
11. Learned quite a bit from him but still learned more from classmates. Would rather had Ramesh as lab instructor full time
12. Needs work on presentation style. He needs to project his voice better.
13. Very good instructor.
14. The instructor's overall prformance in this course was excellent. his approach to different questions was really very good. He has really shown good ability in teaching. Wish him all the best.
15. Don't take a promise (an appointment that you agree to be in the office) seriously
16. He is as good an instructor as I have had in any of the labs I've taken. He communicates ideas effectively and is able to organize those ideas into a pattern which makes following his lectures easy. Good job.
17. Ramesh can explain ideas clearly despite a small language barrier. I can follow his lecture and at least learn the topic. I liked having Ramesh as an instructor and would like him as asn instructor in the future. Unix is still less than user friendly.
