

**(Optional) Homework Extra** Due: 4/21-22 in class (turn in one piece of paper)

Download and solve the C Version of Exam2

<http://users.ece.utexas.edu/~valvano/Volume1/Exam2X-InC.zip>

**Submit a single sheet of paper with a screenshot that clearly shows the following:**

1. *The top of your exam2.c file with your name/eid in it.*
2. *The UART window showing a score of 100*

Note that this homework is optional but we strongly urge everybody who needs practice with C programming to do it. Also, this can be used to replace homework you missed (or plan to miss).
