

EMBEDDED SYSTEMS:

REAL-TIME OPERATING SYSTEMS FOR
ARM[®] CORTEX[™]-M MICROCONTROLLERS

Volume 3

Fifth Printing

January 2019

Jonathan W. Valvano

5th printing
January 2019

ARM and uVision are registered trademarks of ARM Limited.
Cortex and Keil are trademarks of ARM Limited.
Stellaris and Tiva are registered trademarks Texas Instruments.
Code Composer Studio is a trademark of Texas Instruments.

Table of Contents

Preface to The Fifth Printing	xii
Preface to Volume 3.....	xii
Acknowledgements	xiii
1. Computer Architecture.....	1
1.1. Introduction to Real-Time Operating Systems.....	1
1.1.1. Real-time operating systems.....	1
1.1.2. Embedded Systems	3
1.2. Computer Architecture.....	4
1.2.1. Computers, processors, and microcontrollers	4
1.2.2. Memory.....	7
1.3. Cortex-M Processor Architecture.....	9
1.3.1. Registers.....	9
1.3.2. Stack.....	11
1.3.3. Operating modes	13
1.3.4. Reset	14
1.3.5. Clock system	14
1.4. Texas Instruments Cortex-M Microcontrollers	15
1.4.1. Introduction to I/O	15
1.4.2. TI TM4C123 LaunchPad I/O pins	17
1.4.3. TI MSP432E401Y/TM4C1294 LaunchPad I/O pins.....	21
1.4.4. TI MSP432P4 LaunchPad I/O pins.....	26
1.4.5. Interfacing to a LaunchPad	29
1.5. ARM Cortex-M Assembly Language	30
1.5.1. Syntax.....	30
1.5.2. Addressing modes and operands	32
1.5.3. List of twelve instructions	32
1.5.4. Accessing memory	34

1.5.5. Functions.....	37
1.5.6. ARM Cortex Microcontroller Software Interface Standard.....	39
1.5.7. Conditional execution.....	40
1.5.8. Stack usage	42
1.5.9. Floating-point math.....	43
1.5.10. Keil assembler directives.....	47
1.6. Pointers in C.....	48
1.6.1. Pointers	48
1.6.2. Arrays.....	50
1.6.3. Linked lists.....	51
1.7. Linking Assembly to C	53
1.8. Macros in C	54
1.9. Function Pointers in C.....	56
1.10. Exercises	57
2. Microcontroller Input/Output	59
2.1. Parallel I/O	59
2.1.1. TM4C I/O programming	60
2.1.2. MSP432P4 I/O programming.....	63
2.2. Interrupts	68
2.2.1. NVIC.....	69
2.2.2. SysTick periodic interrupts	72
2.2.3. Periodic timer interrupts	75
2.2.4. Critical sections	78
2.2.5. Executing periodic tasks.....	82
2.2.6. Software interrupts.....	83
2.4. Edge-triggered Interrupts.....	84
2.4.1. Edge-triggered interrupts on the TM4C123.....	84
2.4.2. Edge-triggered Interrupts on the MSP432P4.....	88
2.5. UART Interface	91
2.5.1. Transmitting in asynchronous mode.....	93

2.5.2. Receiving in asynchronous mode	94
2.5.3. Interrupt-driven UART on the TM4C123	95
2.5.4. Interrupt-driven UART on the MSP432P4.....	100
2.6. Synchronous Transmission and Receiving using the SSI.....	102
2.7. Input Capture or Input Edge Time Mode.....	104
2.7.1. Basic principles	104
2.7.2. Period measurement on the TM4C123	106
2.7.3. Period measurement on the MSP432P4	110
2.7.4. Pulse width measurement.....	115
2.7.5. Ultrasonic distance measurement.....	115
2.8. Pulse Width Modulation	115
2.8.1. Pulse width modulation on the TM4C123.....	116
2.8.2. Pulse width modulation on the MSP432P4	117
2.9. Analog Output.....	120
2.10. Analog Input.....	121
2.10.1. ADC Parameters.....	121
2.10.2. Internal ADC on TM4C/MSP432E4	122
2.10.3. Internal ADC on MSP432P4.....	126
2.10.4. Central Limit Theorem	130
2.11. Board Support Package	131
2.12. Introduction to Debugging.....	133
2.12.1. Overview of Debugging	133
2.12.2. Functional Debugging	137
2.12.3. Performance Debugging (FFT analysis).....	139
2.12.4. Debugging heartbeat.....	142
2.12.5. Profiling	143
2.13. Exercises.....	144
3. High Speed Input/Output.....	147
3.1. The Need for Speed	147
3.2. High-Speed I/O Applications	148

3.3. General Approaches to High-Speed Interfaces	150
3.3.1. Hardware FIFO.....	150
3.3.2. Dual Port Memory.....	151
3.3.3. Bank-Switched Memory	152
3.4. Fundamental Approach to DMA	153
3.4.1. DMA Cycles	153
3.4.2. DMA Initiation.....	154
3.4.3. Burst versus Single Cycle DMA	155
3.4.4. Single Address versus Dual Address DMA	156
3.4.5. DMA programming on the TM4C123	158
3.5. Exercises	165
4. Thread Management	167
4.1. Introduction to RTOS	167
4.1.1. Motivation	167
4.1.2. Parallel, distributed and concurrent programming	168
4.1.3. Introduction to threads.....	170
4.1.4. States of a main thread.....	171
4.1.5. Real-time systems	172
4.2. Thread Management	176
4.2.1. Two types of threads.....	176
4.2.2. Thread Control Block (TCB).....	177
4.2.3. Creation of threads	179
4.2.4. Launching the OS	181
4.2.5. Switching threads	182
4.2.6. Profiling the OS.....	183
4.2.7. Running the Scheduler in C	185
4.3. Periodic Tasks	186
4.4. Thread Suspend	188
4.5. Thread Sleeping	190
4.6. Thread Creation and Killing	191

4.7. Exercises	192
5. Thread Communication/Synchronization	193
5.1. Spin-lock Semaphores	193
5.2. Spin-lock Semaphore with Cooperation	196
5.3. Blocking semaphores	197
5.3.1. The need for blocking	197
5.3.2. The blocked state	198
5.3.3. Implementation.....	200
5.4. Thread Synchronization	202
5.4.1. Resource sharing, nonreentrant code or mutual exclusion.....	202
5.4.2. Condition variable.....	203
5.4.4. Thread Rendezvous	204
5.4. Producer-Consumer Problem	204
5.4.1. Thread communication between two threads using a mailbox ...	205
5.4.2. Producer/Consumer problem using a FIFO	208
5.4.3. Little's Theorem.....	208
5.4.4. Three-semaphore FIFO implementation.....	209
5.4.5. Two-semaphore FIFO implementation.....	213
5.4.6. One-semaphore FIFO implementation	215
5.4.7. Kahn Process Networks.....	216
5.5. Debouncing a switch	218
5.5.1. Approach to debouncing without an OS	218
5.5.2. Debouncing a switch on TM4C123 with on OS	219
5.5.3. Debouncing a switch on MSP432 with an OS	221
5.6. Monitors	223
5.7. Path Expression	225
5.8. Deadlocks	227
5.9. Exercises	230
6. Thread Scheduling	233
6.1. Introduction to Scheduling	233

6.2. Cooperative Scheduler	235
6.3. Priority scheduler	237
6.3.1. Implementation.....	237
6.3.2. Starvation and aging	238
6.3.3. Priority inversion and inheritance on Mars Pathfinder	239
6.3.4. Running event threads as high priority main threads	240
6.4. Fixed Scheduling	241
6.5. Other Scheduling Algorithms	245
6.5.1. Multi-level Feedback Queue	247
6.5.2. Shortest Job First, SJF	248
6.6. Exercises	249
7. Memory and Process Management	251
7.1. Memory Management	251
7.1.1. Use of the heap.....	251
7.1.2. Simple fixed-size heap	253
7.1.3. Memory manager: malloc and free	255
7.2. Process Management	259
7.3. Dynamic loading and linking	260
7.4. Exercises	262
8. File System Management	263
8.1. Performance Metrics	263
8.1.1. Usage	263
8.1.2. Specifications.....	264
8.1.3. Fragmentation	265
8.2. File System Allocation	266
8.2.1. Contiguous allocation	267
8.2.2. Linked allocation	268
8.2.3. Indexed allocation	269
8.2.4. File allocation table (FAT)	270
8.3. Solid State Disk	272

8.3.1. Flash memory.....	272
8.3.2. Flash device driver	274
8.3.3. eDisk device driver	275
8.3.4. Secure digital card interface.....	277
8.4. Simple File System	282
8.4.1. Directory	283
8.4.2. Allocation.....	283
8.4.3. Free space management	284
8.5. Write-once File System	285
8.5.1. Usage.....	285
8.5.2. Allocation.....	287
8.5.3. Directory	290
8.5.4. Append	291
8.5.5. Free space management	293
8.6. Readers-Writers Problem.....	294
8.7. Exercises	295
9. Communication Systems	299
9.1. Fundamentals	299
9.1.1. The network	299
9.1.2. Physical Channel	302
9.1.3. Wireless Communication	305
9.1.4. Radio	306
9.2. Controller Area Network (CAN)	308
9.2.1. The Fundamentals of CAN	308
9.2.2. Texas Instruments TM4C CAN.....	311
9.3. Embedded Internet	315
9.3.1. Abstraction	316
9.3.2. Message Protocols	318
9.3.3. Ethernet Physical Layer	319
9.3.4. Ethernet on the TM4C1294/MSP432E401Y	321

9.4. Internet of Things	323
9.4.1. Basic Concepts.....	323
9.4.2. UDP and TCP Packets.....	325
9.4.3. Web server	326
9.4.4. UDP communication over WiFi	328
9.4.5. Other CC3100 Applications	332
9.4. Bluetooth Fundamentals	334
9.4.1. Bluetooth Protocol Stack.....	336
9.4.2. Client-server Paradigm.....	339
9.5. CC2650 Solutions	340
9.5.1. CC2650 Microcontroller.....	340
9.5.2. Single Chip Solution, CC2650 LaunchPad.....	343
9.6. Network Processor Interface (NPI).....	343
9.6.1. Overview.....	343
9.6.2. Services and Characteristics.....	346
9.6.3. Advertising.....	348
9.6.4. Read and Write Indications.....	349
9.7. Application Layer Protocols for Embedded Systems.....	350
9.7.1. CoAP	350
9.7.2 MQTT	352
9.8. Exercises	353
10. Data Acquisition and Signal Processing	355
10.1. Data Acquisition Systems	356
10.1.1. Approach	356
10.1.2. Performance Metrics	358
10.1.3. Audio Input/Output.....	364
10.1.4. IR distance measurement	366
10.1.5. VL53L0X Time of Flight Distance Sensor.....	367
10.2. Basic Principles of Digital Signal Processing.....	368
10.3. Multiple Access Circular Queue	373

10.4. Using the Z-Transform to Derive Filter Response	376
10.5. IIR Filter Design Using the Pole-Zero Plot.....	380
10.6. Discrete Fourier Transform	385
10.7. FIR Filter Design	387
10.8. Direct-Form Implementations.....	389
10.9. Exercises.....	391
11. Robotic Systems.....	393
11.1. Introduction to Digital Control Systems	393
11.2. Binary Actuators.....	394
11.2.1. Electrical Interface	394
11.2.2. DC Motor Interface with PWM	398
11.3. Sensors	402
11.4. Odometry.....	403
11.5. Simple Closed-Loop Control Systems.....	406
11.6. PID Controllers.....	409
11.6.1. General Approach to a PID Controller.....	409
11.6.2. Design Process for a PID Controller	412
11.7. Fuzzy Logic Control	416
11.8. Exercises.....	425
12. Commercially Available RTOS.....	427
12.1. Micrium uC/OS-II.....	427
12.2. Texas Instruments RTOS	430
12.3. ARM RTX Real-Time Operating System.....	432
12.4. FreeRTOS	433
12.5. Other Real Time Operating Systems.....	434
Appendix 1. Glossary	435
Appendix 2. Solutions to Checkpoints	453
Index	460
Reference Material.....	469
